MEMORANDUM FOR: Assistant for Technical Development, NPIC

SUBJECT: NPIC Project [redacted] High Precision
Stereo Comparator

25X1

REFERENCE: NPIC/TDS/D-1161-67

1. In regard to reference memorandum it should be noted that at the NPIC meeting of 21 November, attended by TID, Logistics Branch of the Support Staff, and TDS Technical Development Staff, the Technical Intelligence Division personnel were in 100% agreement with [redacted] recommendation to install the new stereo comparator on the first floor of NPIC. There is no question about this in the minds of TID personnel following a review of recent meetings with [redacted] development personnel. We understand that installation on the first floor will solve the ceiling clearance problem, and also simplify the vibration problem encountered with installation on the second floor.
